SUMMARY

Computer Science graduate with hands-on SOC experience (alert triage, incident response) and Python-based cloud security tooling (AWS IAM/CloudTrail automation, container and Kubernetes security testing). Comfortable in Linux environments and building automation scripts for cloud and application security.

EXPERIENCE

Security Operations Engineer (Intern)

05/2026 – 06/2026

- Monitored and triaged security alerts generated by a unified cyber assurance platform (SOC/NOC/TOC) built on open-source EDR and SIEM tooling
- Collaborated with senior analysts on alert validation, escalating confirmed incidents through defined L1-to-L2 SOC workflows, Devops and Customer IT.
- Investigated escalated incidents and documented findings in triage reports to support analyst decision-making and remediation

PROJECTS

CloudGuard: AWS Security Monitoring Tool

Tech: Python, boto3, FastAPI, Next.js, AWS (CloudTrail, IAM)

- Built a cloud security validation tool detecting brute-force logins, missing MFA, and overly permissive IAM policies from real AWS CloudTrail/IAM data.
- A dynamic risk-scoring engine that automatically adapts access based on real-time behavioral anomalies or threat intelligence(Which is not natively built into standard AWS IAM).

BreachSim: Kubernetes/Cloud Security Control Validator

Tech: Python, Terraform, Kubernetes, Docker, eBPF (bpfftrace), AWS

- Simulated real attacker techniques (container escapes, privilege escalation, network policy bypass) against Terraform-provisioned Kubernetes and cloud infrastructure
- Built a Python-driven test runner producing pass/fail validation reports per security control, mirroring real-world security control validation workflows

SecOps CLI Tool: Network & System Security

Tech: Python, Bash, Linux, fzf, pynput, nmap

- Built a modular CLI security toolkit (secops-toolkit validate/monitor/scaffold) unifying network validation, input monitoring, and project scaffolding under one interface.

TECHNICAL SKILLS

Cloud & DevSecOps — AWS, Docker, Kubernetes, Terraform, Git, CI/CD (GitHub Actions)

Security Operations — Alert triage, Incident Response, Escalation and Reporting

Tools — Wireshark, Wazuh, Nmap, Tcpdump, BurpSuite, OWASP ZAP

Technology — eBPF (basic understanding, bpfftrace)

Programming Language — Python, Bash, TypeScript, SQL

Operating Systems & Environments — Linux (Arch/Kali/Ubuntu) ,Windows

Development Frameworks — Next.js, React, Flutter

CERTIFICATES

AWS Certified AI Practitioner 🏆 — Amazon Web Services (Issued: Aug 2026 | Valid through: Aug 2029)

AWS Certified Cloud Practitioner — Amazon Web Services (Issued: Sep 2026 | Valid through: Aug 2029)

AWS Certified Security Speciality — Amazon Web Services | In Progress, Expected Exam Oct 2026

EDUCATION

Bachelor of Engineering in Computer Science and Design

2022 – 2026

Sri Krishna College of Engineering and Technology

HSC - Computer Science Stream

2020 – 2022

Don Bosco Matric School
